PROFESSIONAL SUMMARY

Application Support Engineer with 5+ years of experience in L2/L3 production support for mission-critical enterprise platforms across banking and HR technology. Experienced in incident management, batch job monitoring (Autosys), application observability (Splunk, AppDynamics, Grafana), ITIL change and problem management, SQL/PL-SQL-based data validation, Java-based application support, and credential/access migrations across large-scale system integrations. Skilled in building AI-assisted tools using Microsoft Copilot to speed up production troubleshooting.

CORE SKILLS

Production Support: L2/L3 Incident Management, Root Cause Analysis, ITIL (Incident, Change, Problem Management)

Monitoring & Observability: Splunk, AppDynamics, Grafana, Prometheus

Platforms & Tools: Workday, DocuSign, Autosys, ServiceNow, JIRA

Programming & Automation: Java (application support), Microsoft Copilot Agent Development, Bash/Shell Scripting

Databases & Systems: SQL, PL/SQL, DB2, Linux (RHEL, Ubuntu)

PROFESSIONAL EXPERIENCE

Application Support Engineer (L2/L3) | Morgan Stanley

Bengaluru, India

October 2023 - September 2026

- Provide L2/L3 production support for enterprise HR technology applications including Workday, DocuSign, Autosys, and ServiceNow.
- Supported and troubleshoot Java-based enterprise applications, diagnosing application-level production issues and coordinating fixes with development teams.
- Designed and deployed a Microsoft Copilot-based Log Analyzer Agent to give engineers faster access to log context during incident triage, routing knowledge through OneNote to work around the platform's Instructions field character limit.
- Built a Microsoft Copilot 365 agent for batch job monitoring and off-hours incident response, reducing manual job-status lookups during on-call shifts.
- Led a Workday HRDW credential migration, rotating user IDs across 50+ integrations with zero service disruption; identified that shared delivery-service updates do not auto-propagate to individual integrations, preventing a broader outage.
- Investigated a recurring message-queue alert storm on a batch reporting queue, root-caused the trigger, and escalated with supporting evidence to the messaging team for a permanent fix.
- Monitor application health via Splunk, AppDynamics, and Grafana dashboards to identify production anomalies before user impact.
- Manage incident, request, and change tickets in ServiceNow in line with ITIL practices.
- Build executive-facing PowerPoint reporting decks for monthly HR Technology leadership reviews.

Consultant - Corporate Workspace & HR Technology | Morgan Stanley

Bengaluru, India

November 2022 - June 2023

- Supported global workforce identity, directory, and access platforms, handling provisioning and production issues under SLA.
- Performed SQL/PL-SQL-based data validation and troubleshooting for production identity workflows.
- Partnered with information security, network, and infrastructure teams to resolve cross-functional incidents and changes.

Operations Data Associate | Carelon Global Solutions

Bengaluru, India

September 2020 - January 2022

- Performed backend SQL data validation on production financial datasets, identifying and resolving structural discrepancies within SLA.
- Maintained data quality and operational compliance within a HIPAA-regulated environment.

KEY PROJECTS

- Copilot Log Analyzer Agent: Built a knowledge-augmented Microsoft Copilot agent for L2 log triage, using OneNote as an external knowledge source to bypass the 8,000-character Instructions field limit.
- Workday Credential Migration: Rotated credentials across 50+ HRDW integrations and identified a propagation gap in the shared delivery service before it caused a production incident.

EDUCATION

Bachelor's Degree

Vijayanagar Sri Krishnadevaraya University, Ballari - 2019
